# Embedding a Video or Object

For some of your activities, you'll be asked to embed the object on your **Classwork** page. These instructions will guide you through that process.
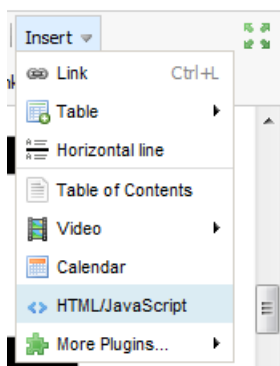

1. Locate the **embed code** on the website. You should easily find it after completing your object.

2. Copy the code.

3. Toggle back to your Classwork page; make sure you're in **Edit** mode.

4. Place your cursor in the correct place and click **Insert** > **HTML/JavaScript**.

5. Paste the code in the box and click **Next**.

If you're not given options on the site, you can change the SIZE of your object by altering all of the width/height references throughout the code. Be careful not to change anything else.

You will NOT see the option to Allow JavaScript because you are not the administrator of this workspace.

Embedding a Video or Object

6. This screen will appear; click **Insert Plugin**.

Insert Plugin

HTML/JavaScript: < div style=&qu...

This is what you will see in the editor until you save the page.

« Back   Insert Plugin   or cancel

7. **Save** your page, and your embedded object will appear.

8. Enjoy!

••

- To embed most videos, choose **Insert** > **Video.**
- To embed various other objects, choose **Insert** > **More Plugins**.
